

Union Ballroom Scene Of Gathering As Graduates Meet At Annual Smoker

G. C. McDonald, Delivers Address — Red And White Revue, Band, And Glee Club Provide Entertainment — Mac-Gregor And Berkowitz Win In Boxing Bouts — Sir Arthur Currie Explains Ban of Sale of Black Sheep And Alarm Clock.

SPEECHES by Sir Arthur Currie, G. C. McDonald, P. D. Ross, and G. McL. Pitts; marches, songs and dances by the Band, the Glee Club and the Red and White Revue; boxing bouts, professional entertainment and refreshments featured the fourth annual Graduates' Smoker held in the Union Ballroom last night.

Following the welcoming address by Mr. Pitts, President of the Montreal Branch of the McGill Graduates Society and chairman of the gathering, and the boxing bouts staged under the direction of Bert Light, Mr. G. C. McDonald, Arts '04 delivered a special address on "The Challenge of the Debt Situation."

Debt Situation
Dividing the debt situation as it exists today into the three classes, war debts, speculative debts, and government debts, the guest speaker proceeded to eliminate the first two divisions as being already on the way to correction or as being outside of the realm of Canadian jurisdiction and confined his attention to government debts.

In regard to the latter it was pointed out that much could be said and done to advantage. Primarily it is necessary to balance the budget and thus restore confidence both at home and abroad. These debts were, for the most part, created because of government participation in business and education both of which could, in the speaker's opinion, have been supervised by the government rather than operated by it to the greater advantage of the taxpayers. Income tax was stressed as being one of the most fair and easily collected taxes and therefore should be made to form the basis of government revenues.

Thanks Speaker
In thanking the speaker Sir Arthur Currie expressed the opinion that facts must be faced with the courage and intelligence that Mr. McDonald had shown. He added that he considered it his duty to explain the action taken by him concerning the two undergraduate publications which were banned yesterday.

In this regard he emphasized that he believed in freedom of opinion among students and staff members, but that it was extremely necessary that publications such as those banned should not receive the official sanction of the University if they show bad taste or are not perfectly fair, impartial and honest. Publications of any periodicals might well be made outside the University but the University itself has a responsibility to its benefactors and friends that cannot be overlooked, the principal added.

Entertainment Follows
The addresses by Mr. McDonald and Sir Arthur Currie were followed by various forms of entertainment by the "Red & White Review" while the Glee Club led the crowd in college songs. Mr. P. D. Ross, Applied Science '78, and President of the McGill Graduates' Society, advised all undergraduates to join the Graduates' Society after receiving their degrees. In this manner they would be able to strengthen this organization and be able to repay the University, in a measure, for the financial loss of over \$1,000 which every undergraduate imposes on McGill.

Ski Trip

A brief description of the ski trip to Switzerland of the McGill and Red Bird Ski clubs was given by Mr. H. S. Maxwell, Arch. '28, who was in charge of the team. Dr. Bobby Bell, coach of the McGill senior hockey team, gave a short talk, stressing the fact that the complete harmony between the various members of the team is the main reason why the Intercollegiate hockey championship is likely to return to McGill this season.

The chairman of the function, Mr. McL. Pitts, Arch. '16, thanked Mr. Bruno and the Managing Board of the McGill Daily for their work in issuing the special Graduates' number which appeared on the campus yesterday. He also advised those present that Thursday, February 9, was to be Graduates' night at the play "He Who Gets Slapped" which is being produced by the Players' Club. Following the production the graduates are to assemble in the Ballroom of the Union for a supper dance.

The University Band played several selections while a buffet supper was partaken of. Mr. Gordon B. Glasco acted as master of ceremonies.

Staff Vacancies

There exist at the present time several vacancies in the editorial staff of the Sports Department. Any students interested, whether male or female are asked to see the Sports Editor in the Daily office between one and two today.

Ottawa Conference Considered Failure In Confining Trade

International Commerce Restricted By Imperial Treaties

RESULTS OUTLINED
Boxer And Schafhausen Address Political Economy Club Meeting

That the Ottawa Conference of 1932 was a failure in that it raised tariffs, did not treat the United Kingdom fairly, and spoiled, if not ruined, Britain's international trade with several European and South American countries, was shown at the meeting of the Political Economy Club held in the Smoking Room of the Arts Building last night, at which Mr. Boxer and H. Schafhausen delivered papers.

The first speaker, Boxer, outlined the background, purpose, and agreements of the Imperial Conference, showing that the idea of Empire preference is by no means new, and that the agreements arrived at were entirely different from the aims of the conference.

Purposes of Conference
The purposes of the conference as he outlined them were to seek a solution to the problems of reparations, the crisis, bankruptcies, unemployment, and the possible return of prosperity. In 1930, international commerce was down 40 per cent; every country was internally and externally troubled; a remedy was needed, and the conference was to find that remedy.

Whereas the aims of the conference should have been lower tariffs, break barriers stimulate world trade, and destroy economic nationalism, the exact opposite was accomplished, the speaker stated. Tariffs are now higher, the British Empire is one large trade union, international trade is suffering, and instead of economic nationalism we have economic imperialism equally bad.

Former Conferences
Referring to various conferences of the last half century, Boxer traced the general feeling of imperial preference and free trade within the Empire, which was to culminate in the July, 1932, conference. The only result that has manifested itself is an increase in Empire and Inter-Empire trade, with a corresponding decrease in foreign trade.

In treating the agreements of the conference, Henry Schafhausen briefly stated first that the delegates from the Dominions and from the United Kingdom had come to Ottawa with the sole idea of returning home with agreements of some nature.

Agreements Hurt Britain
The agreements arrived at were mainly very beneficial to the Dominions, but disastrous to Britain. For example, Canada retained the right to stop England from trading in certain commodities with foreign countries, if such trade would hurt Canada. In figures, for every dollar that Canada benefits by the treaty, England benefits only half that amount; in the case of some other Dominions, this fraction is lowered considerably.

The result of the agreements on England's trade with Argentina, for example, is harmful to the mother country. England, according to the treaties, is to import wheat and meat from Canada, Australia and New Zealand. Formerly she imported a large quantity from the Argentine as well; in fact, one-fifth of the South American country's exports were accounted for in this way. If Argentina is to suffer, her natural instinct is to retaliate, which she is doing, by assigning contracts to France and Germany; these would otherwise go to Britain.

The British investment in South America is five times that in North American colonies; these will suffer, and hurt British capital. Britain can use all of Canada's wheat, but Canada can not use a fraction of the mother country's industrial products, which she is supposed to accept in return.

All in all, both speakers conceded that the aims, purposes, reason, and excuse for the conference were not justified by the results, and that it failed in that tariffs were raised and international trade was minimized.

Freshmen Dinner

Professor Evans To Be Guest Speaker

Tonight in the Grill Room of the Union the class of Arts '38 will gather for dinner. Professor Evans will be the speaker. The executive has obtained a first-class pianist and a rousing sing-song is planned. The price will be 55 cents, payable at the door. Although the dinner is primarily for the class of Arts and Science '38 all freshmen are invited.

After the meal the class will adjourn to the Forum to see the McGill-Columbus hockey game, which is the last game of the season at which student coupons will be accepted.

Players' Committee Leaders Discussed Plans At Luncheon

GATHERING for lunch in the Grill of the Union yesterday, the heads of the Production and Business Committees discussed generally the progress that has thus far been made in the work on the production of "He Who Gets Slapped." Cecil West, the director of the play, gave a brief account of how the rehearsals were getting on, and expressed his belief that the cast was quite capable of putting the show across in a satisfactory manner.

All those present were urged to make the utmost advantage of their personal contacts in the disposal of tickets. Plans for publicity were then discussed, and it was announced that the play would be given added publicity over the Graduates' Broadcast.

Outstanding Periods In Music Described

Dean Clarke Speaks To Music Club At R. V. C.

THREE DIVISIONS
Knowledge of History Of Music Essential To Understanding

Few people who listen to music are able to identify it with the century to which it belongs, or with any specific phase in the history of the development, whereas a few hours spent in gaining some knowledge of its history will add greatly to an understanding and is imperative to a full appreciation of music, stated Dr. Clarke, dean of the Faculty of Music, in addressing the Music Club yesterday afternoon in R.V.C. on "A Brief Survey of Music."

Three periods are outstanding in the development of music—the Religious, the Domestic and the Secular or General periods. The Greek left us nothing in the way of harmony, however it is possible that they were able to supply mentally the upper partials on notes which have a bare tone on paper and in this way created for themselves a certain harmony in their music — this however is mere conjecture.

During the Middle Ages all learning and art centered in the monasteries, music was therefore in the hands of churchmen, but it lacked variety and symmetry of rhythm and was purely vocal. In the 11th century, during the Domestic Period, the first real school of music was established and capacity for variety in vocal writing reached its zenith. Music became a vital part of the education of every Elizabethan, and for twenty-five years, flourished the finest musical period in the history of any nation, by 1600 no trace of it remained, and with the exception of the works of Purcell, England underwent a barren period until the 18th century.

The 17th century saw the beginning of the Secular Period, public performances were for the first time prevalent, science provided musical instruments, the opera and the virtuoso came into being. Handel, who, "keeping his fingers on the public pulse" dashed off oratorio after oratorio, with a view to filling his own pocket, completely dominated England who fell under the tonal influence of his music. Handel presents a marked contrast to Bach, who led a simple life, writing only for the church and indifferent to society.

Vocal writing reached its culminating point with Bach and has never been surpassed, — for after Bach, the contrapuntal style fell into disfavor. The beginnings of opera and of feeling for the dramatic, which were to culminate in the works of Wagner began with Gluck. However, a reaction to this tendency appeared in the compositions of Haydn, Mozart, Beethoven and Schubert, who felt that music had a definite field apart from the stage. Music, hence which had been concerned with polish and form, became expressionistic in character.

Sensuous Harmony
After the sensuous harmony of Schubert's works, Brahms was not received with exaltation, however he is outstanding for his use of the device of "suspension" and for the wonderful sweep of his melody, and a strong affinity between Brahms and Bach is apparent.

Dr. Clarke concluded his address by a reference to Wagner who perfected the dramatic tendencies of Gluck, invented the "leit-motif" and is important for extraordinary combination of instruments. Naomi Jackson and Alice Miller presided at the tea which was served at the end of the meeting.

Two Scholarships To Be Granted By Hung Tao Society

Dr. Kiang Kang-Hu Speaks On Wen Tze And His Work Last Night

AUTHOR UNKNOWN
Types of Government Depicted By Chinese Philosopher

The establishment of two bursaries of \$50.00 each by the Hung Tao Society was announced at the meeting last night. These are to be awarded to the most needy Chinese student in English studies as well as to the English student found qualified in Chinese studies at this university.

Upon speaking on the author of Wen Tze and his work, Dr. Kiang Kang-hu stated that this was the last of the four books of Confucian classes and the five canons of Taoism. The author was unknown and a subject of much debate, but upon further study was found to be Wen Chung, or "all philosopher" as he was better known.

Wen Chung Native
Wen Chung was a native and statesman of Yueh State, not far from the present situation of Shanghai. He lived about 500 B.C. at the time when China was divided into many independent states who were constantly warring against one another. Strife was fiercest between the Yueh and Woo States, and the latter conquered the former taking the king and his two statesmen, Fan Li and Wen Chung, as prisoners.

They finally managed to escape and reversed the conditions by over-coming the Woo State. Although entreated by his family to resign from political affairs, Wen Chung patriotically refused, and finally was imprisoned by the king with whom he was in conflict and died there.

Wen Tze is the "largest" book of the Taoism series. It is divided into twelve books, and each one into several sections. Its characteristic feature is that it contains much political and economical philosophy and theory, thus showing the true Chinese philosopher who is a moralist as well as a social reformer.

According to his theory there are four types of government: — First, that governed by law or constitution. Second, that by benevolence, justice, rites or wisdom. Third, that by personal virtue or inspiration. Lastly, that by natural law. This last is the ideal form of government as it does not go to extremes but reserves energy for future.

It is regrettable that this book, which contains so many proverbs and ancient sayings with a very profound meaning, is not translated and still remains in its present state scattered in different parts of the country. It is to be hoped that advance studies will be made on this subject in the near future and thus throw some light on the subject.

Lecturer On World Affairs At McGill

Dr. S. Eddy To Preach In Divinity Hall

Dr. Sherwood Eddy, one of the foremost lecturers and writers of today on world affairs, is to be in Montreal and at McGill over the week-end. Earlier this week Dr. Eddy spoke on Russia to a crowded audience in Convocation Hall, University of Toronto. Owing to a very busy program while in Montreal, Dr. Eddy will be heard only once in McGill during his visit. He will be the preacher at the University Services in Divinity Hall at 11:30 Sunday morning, the service being arranged by the Students' Christian Movement.

Although an American by birth and a graduate of Yale University Dr. Eddy is in reality a World-citizen, having travelled continuously in all parts of the world. He has visited Russia six times; he has conducted parties of tourists to the different countries of Europe; he has frequently visited China and Japan, and is able to speak of their problems with the greatest understanding.

Among his best known writings are the Challenge of Russia, Facing the Crisis, The Challenge of the East, Man-churia, and Danger Zones of the Social Order. His many friends include Premier Ramsay MacDonald, George Bernard Shaw, Mahatma Gandhi and Professor Einstein.

Chemical Society

The Chemical Society will hold its next regular meeting in the Main Lecture Theatre of the Macdonald Chemistry and Mining Building at 5:00 p.m. today. Mr. L. Holmes will speak on "An Ammonia World." All interested are invited to attend.

Newman Club Will Hear Shaughnessy Speak On Sunday

THERE will be a meeting of the Newman Club of McGill this Sunday morning at 9:50 in Congress Hall, Dorchester and St. Alexander Streets. Following mass, a buffet-breakfast will be served, after which F. Shaughnessy, McGill football coach, will address the club. The topic on which Mr. Shaughnessy will speak will doubtless prove to be very interesting.

Besides the entertainment there will be a business meeting to discuss the final arrangements for the coming Newman "At Home." This affair, which is in the form of a dance, will take place Friday, February 24th, at the Mount Royal Hotel. The subject of election of club officers will also be discussed. All Catholic students at McGill are requested to attend.

Role Of Ethics In Everyday Life Told

Ethics Consists of Adequate Knowledge Of Standards

DESIRES DESCRIBED
Question Raised Whether Study In Ethics Can Overcome Habit

"The part that the study of Ethics plays in life" was the subject upon which William Thomas delivered an address last night at the meeting of the Philosophical Society at Strathcona hall. Preceding this talk the president of the society announced that the annual election of officers would take place next week.

In his address Thomas stated that the value of Ethics consists in its discovery of adequate standards of life. Ethics introduces us to desires possessing standard values; desires of men which are valuable for their own sake; desires which do not have to result in actions for material gain to justify themselves.

Three Have Value
Of the many desires of man three were named which possess absolute values; values which depend solely on their being precious to us. The first of these is right; man pursues right for its own sake; pursues it without regard for the consequences. Also truth is sought after merely because of our love for it.

Lastly, beauty possesses sufficient merit of itself to justify our desire for it. Beauty does not tell us to do anything but to enjoy things. Thomas concluded with the statement that he cannot see how the study of Ethics can fail to awaken the mind to good and right.

Discussion Follows
In the discussion which followed one of the points presenting some difficulty was whether the study of Ethics could overcome the force of habit or even influence it greatly. Again there were many opinions voiced as to whether every thought ultimately resulted in or in any way changed our actions.

Parliament Defeats Tax On Bachelors

Government of Arts '34 Is Overthrown On Radical Measure

College bachelors are again at their ease as the Arts '34 Mock Parliament yesterday in the Arts Building defeated the motion proposed by the government that a tax be levied on all bachelors over 25 years of age. With the Reverend George as Speaker, Prime Minister Dave Goodman introduced the bill, which was seconded by John Nolan. The opposition forces were led by Mark Goldenberg and Leo Kunelius.

Goodman, in proposing the motion, stressed the fact that the budget must be balanced and the easiest way to obtain the money was to tax the unmarried man. Besides it would add to the population. John Nolan defended the bill and pointed out the necessity of children and families for Canada. He emphasized the settling effect a family has upon a man, and Mussolini's experiment in applying a bachelor tax was brought forward as a proof of the bill's efficacy. Nolan closed his speech with an appeal to think of the poor co-eds who will be done "out of their man" if the bill does not go through.

Mark Goldenberg, in leading off for the Opposition, used economic arguments to prove the ridiculousness of the bill proposed by the government. By showing the fact that the tax cannot be a good tax for it does not conform to Mills' canons of taxation, the Leader of the Opposition condemned

Cosmic Rays Show Expansion Of Space Conception Correct

Universe Produced By Radio-Active Disintegration Forming Atoms

UNBOUNDED SPHERE
Doppler Effect In Spectrum Shows Nebulae Receding From Earth

Abbe Lemaitre, one of the triumvirate of the world's foremost mathematical physicists which includes Einstein and de Sitter, and foremost exponent of a new conception of the universe, addressed a joint meeting of the McGill Physical Society and the Royal Astronomical Society of Canada last night on "The Expanding Universe." The Abbe, who has spent some time in California, is at present on his way back to the University of Louvain in Belgium.

In an address which was lucid and free from any scientific language unknown to the layman, Abbe Lemaitre justified the observation of Sir James Jeans that "The universe is like an expanding soap bubble," and outlined the observations which led to the conclusion that the universe is neither static nor in equilibrium, but that it is constantly undergoing rapid expansion.

Cosmic Rays Confirmed
This new theory is confirmed by the work that was recently carried out with the cosmic rays. These rays may properly be regarded as super radioactive, and not unlike those produced by the disintegration of radium, uranium, and other radio-active materials. They arose in the past in some part of the universe far removed from the earth, and for a long time astronomers were unable to locate their exact source.

It is obvious that they cannot come from the sun, since they have no diurnal variation, and since all stars are suns, they cannot come from any of the stars. This is verified by the fact that although all-stars have an atmosphere of some kind, the cosmic rays do not encounter one until they reach the surface of the earth. These rays also have such a remarkably high energy content that there is no material present in the universe which is capable of producing them. All these facts would tend to remove their source beyond the range of any modern astronomical telescope.

Like Radioactive Rays
Since the cosmic rays are analogous to radioactive rays, it is now thought that they also have arisen in a similar fashion. It is possible that at some time in the history of the universe there were present some atoms which are now unknown. These disintegrated, and gave more stable atoms, as well as rays, the cosmic rays as we know them.

These atoms must have had a shorter life time than the earth, and were themselves probably followed by atoms which were also capable of disintegration. The only way to account for the whole process is to assume that all atoms are produced by the disintegration of atoms with an incredibly high atomic weight; that all energy is locked up in the atoms, and that the atom tends to split into smaller units.

Space Is Unbounded
In any conception of the universe it is not satisfactory to assume that it is fixed in size, nor is it feasible to assume that it is infinite. The solution to this difficulty lies in assuming that the nebulae of the universe are in a space which is finite but unbounded. In this conception the sphere is not the boundary of nothing, but may be compared to the edge of a flat map, when any point on one side reappears again at the edge on the other side.

Making use of the theory of relativity it is possible to study the variations, in time, of the radius of the universe. It is found that although an equilibrium is present, it is unstable. As a result of this any phenomenon which would tend to increase the radius of the universe would cause a great increase. And conversely, a displacement in the other direction would cause a corresponding great decrease.

Nebulae Recede
If the volume of space increases, then the molecules in it would separate. Since every nebula exhibits certain lines in the spectrum, and any movement on its part causes a displacement of these lines, a means is offered of detecting any changes in their distance from the earth. By employing this Doppler effect it is found that there is actually a motion away from the earth, and that the velocity at which the nebulae recede is proportional to the distance they are removed.

This theory also accounts for the formation of nebulae, and replaces the

McGill Daily

THE OLDEST COLLEGE DAILY IN CANADA
Published every week-day during the College year at 690 Sherbrooke St. West. Telephone LAN-caster 7143.

Montreal, Friday February 3, 1933

Investments

IN his address to the Graduates in the Union Mr. Geo. C. McDonald stated that "instead of realizing that the most important thing for each one of us is to do something and to be something, there has been a tendency among us to over-emphasize the value of possessing something."

Mr. McDonald's reference was to wealth but we believe that this truth has another meaning for those in the university. Wealth of itself can do no good; and a college education if not properly evaluated is just as useless. In fact, it can be positively harmful.

The student whose education is merely superficial, a veneer which cloaks an indifference, or even an ignorance of the affairs of world, affairs in which he, as a college graduate will be expected to take a lead, is a useless member of society. His education is wealth misused.

The wealth of education is the potential leadership it can give to the country. But this wealth if not applied in the right direction, becomes, not an asset, but a liability. The country looks to the possessor of this wealth not to be satisfied only to possess it, but "to use it to the best advantage."

Education, if rightly used, can not only benefit the possessor of that education, but, can also be of service to those with whom he may come into contact. No one can be said to be truly educated, unless his ideal of education is such as to allow for this double benefit.

A college education may mean only that the graduate has in his possession a degree, or, it may mean something more. This something more is the desire "to do something and be something."

The profits from education as the profits from wealth come only from proper investment of the possession. Educational possessions can be invested in the project for social betterment, the solution of economic problems, and the other vexing questions that face modern civilization. Just as surely as unsound investment of wealth leads to disaster to the individual and the nation, so will abuse of education.

Progress?

THIS June will see the opening of the World Fair of 1933 in Chicago, after preparations that have gone on for over a year. A 338-acre tract alongside Lake Michigan, has been set aside for the exhibition and numerous buildings have been built to house the various exhibits. The Fair intends to portray graphically the advances that have been made in the last century, in science, manufacturing, farming, transportation and other fields. The last Fair, just before the turn of the century was a great success. Besides the Chicago Fair, there have been various other Fairs and Exhibitions held in every country, at various times.

Aside from the important purpose of increasing business, these Fairs endeavour to show the advances that have been made in various fields, and the products of a country or section of a country. That there has been advance in science and the external manifestations of civilizations can not be doubted. The vast exhibition that is to take place at Chicago clearly shows this, but the question as to whether we have made an ethical advance is a moot point.

The mere fact that the tools of man in his fight against Nature have been considerably added to, does not prove that mankind is any happier, in fact many thinkers believe otherwise, that is, that man is much more unhappy today than formerly. If we define progress as the satisfying of men's wants, then we can see that many of his superficial wants have been satisfied, but as each want is satisfied, a new want arises. Also the basic desires for justice and peace have certainly not been satisfied, so we can seriously doubt whether we are any happier now than a century ago or whether we have made any ethical progress.

-OF CABBAGES AND KINGS

The Truth At Last

A MOVING-PICTURE concerning McGill will be shown in local theatres soon, according to an announcement in local papers a few days ago. And one of their purposes is to counteract some "popular views of college life."

At last! One of the most insidious views of college life is one which is held by certain adults, viz. that a college is a place to get an education. We hope sincerely that the film will attempt to remove this impression by showing verbatim the conversation between two upperclassmen. For instance, "Who was them men I seen youse with last night?" — "Why, didn't I told you? that was no man that was my boy friend."

No, but seriously fellows, what the hell? There are too many wrong ideas of college life. Now, let this picture show a group of "average" students passing the Pig and Wifistia. They pass it, with averted faces, and the younger ones blush. They speak in hushed voices of the sin that lurks therein. Some music plays. Will this not answer the accusations made by certain Montreal newspapers that McGill students, — shall we say, — drink. There is another impression that is prevalent: — that co-education is not all it might be. The film must deny this, and assure its audiences that co-education is everything it might be, and a lot worse.

A Question Of Names

A RED AND WHITE REVUE advertisement which appeared in the Daily yesterday listed several titles by which this years musical debauch is to be known: — "It's A Herring" and others. But "Drunk In A Trunk" was significantly absent. Current rumour has it that anything not good taste is taboo, hence the ban upon such a catchy and eloquent title. Certainly it must be admitted that "Drunk In A Trunk" savours of the immoral, as trunks are nasty, dirty things, they are used so often for sticking corpses into after a surreptitious murder, and they are generally unworthy of university men and women. Yet we are inclined to suspect that there is a subterranean motive for the avoidance of the name.

After all, the wooden container in the Revue office — where costumes, rejected slips, and that sort of thing is kept — isn't a trunk. It's a sort of box. And the people that crawl into it aren't drunk. Gosh no, they're just sleepy. "Sleepy in a Box" is not a particularly good title for a revue, it appears to apply more appropriately to some of the audience. And if the Revue is to have a title at all, the title must be truthful, and true to facts. But — what would be wrong with "Drunks In A Trunk?"

A Poison Picher

NOW that Howard has cut out my preceding paragraph dealing with The Black Sheep, and other impertinent things, I can get down to write a column.

But anyway, in servile imitation of The Black Sheep — now on sale at the Montreal Book Room and Burton's — I hereby present a poison portrait. You would not recognize it anymore than Dr. — I mean anymore than other people recognised theirs, so I will tell you to whom it refers. Here, gentlemen, is a portrait of The Serious Minded Student:

He believes in the Established Church, although he never goes, and he is a firm believer in the Sanctity of Tradition, the Revolt of Modern Youth, the Immorality of Cynicism and the Folly of Fanaticism. He doesn't mind swearing, smoking, and an occasional drink, but the very idea of his future wife, or any one else's future-wife doing the same absolutely dismays him. There are certain things that people do, and say, and they are perfectly allowable; but it is vicious and indecent to put such things in print. He believes in the Necessity of a Good Time Occasionally, and a temperate indulgence in social intercourse because it is so useful in the business world. He can laugh at slapstick comedy, but he cannot laugh at himself, and cannot understand anyone else laughing at himself. And he cannot understand scepticism, and he reads a subversive and immoral meaning into everything he is capable of understanding.

Another Convert

THE flickering light of several candles illumines a cold, deserted room on — ye Gods, Section Ninety-Eight prevents us from mentioning where. Here, amid the flickering light of several candles — we've mentioned this before but it sounds good — sit a group of Commu — (Ed. Note: Hey! Section Ninety-Eight). Sorry, anyway a group of earnest young men and women sit in this dim mausoleum, and talk bitter deeds, and think bitter thoughts, and think about talking about undermining the Capitalistic system.

Not that you care about what serious people are thinking, but this is the point. A former editor of the Daily, once-steeped in sin, has turned Radical. He attends meetings, froths at the mouth, makes long noses at all limousines, and disdains anything humorous, pointless, and not reminiscent of the fact that "We Are In The Throes Of A Depression."

He regrets bitterly the fact that he once earned money working for a capitalistic employer, and he confesses this sin quite often. This creates a good impression, and, nothing if not ingenious, he still earns money from a capitalistic employer, so he may gain more proselytes by confessing again and again.

THE THEATRES PRESENT

His Majesty's Theatre

THE long awaited "Cavalcade," which has broken all records at the Gayety theatre, New York, for attendance, will have its Canadian Premiere at His Majesty's theatre Sunday evening, February 12th, and will then give two performances daily thereafter at 2:30 and 8:30.

When it comes to accomplishing really impos-

sible things, modern picture studios put the mythical Hercules to shame.

Frank Lloyd directed "Cavalcade," and among the players featured with Mrs. Wynyard and Brook are Ursula Jeans, Herbert Mundin, Una O'Connor, Merle Tottenham, Irene Browne, Beryl Mercer, John Warburton, Frank Lawton, Margaret Lindsay, and Tempe Piggott.

Palace Theatre

THE story of H. G. Wells' "Island of Lost Souls" revolves around the activities of a mad scientist, Charles Laughton, who, upon his expulsion from England, retires to an uncharted island which supports vicious sailors describe as "the scourge of the South Seas." In weird and eerie surroundings, he erects a highly-gearred laboratory and attempts to defy all principles of creation and evolution by developing human beings from animals by a process of electrobiology.

The added attractions comprise a Laurel & Hardy comedy entitled "Towed in a Hole," Hal Roy and Mitze Mayfair in "Tip Tap Toe" and "Technocracy" the most discussed topic of the day treated graphically, simple and entertainingly by Professor Gilbert Brown, one of the originators.

Capitol Theatre

FOR those who like red-blooded action in addition to the comedy and pathos of a heart drama that grips audiences, the Capitol Theatre is now presenting Wallace Beery in "Flesh" with Karen Morley and Ricardo Cortez heading the supporting cast. The second feature is "Warren William in 'The Match King'" with Lili Damita.

"Flesh" is said to be Beery's greatest starring vehicle since "The Champ." The story centres around Beery, a great wrestling waiter in a Berlin Beer garden. There he meets Karen Morley, an American hooper whose dancing partner Cortez, makes the third party in that eternal triangle.

The second feature Warren William in "The Match King" is a picture with a background of strange romances and colossal financial and political intrigues. Released at a time when the world is still echoing its astonishment over the crumbling ruins that are left from the 1929 crash and the ensuing depression.

Princess Theatre

ANOTHER big programme will be given at the Princess theatre commencing tomorrow, when the management will present two outstanding feature pictures, the main offering being "No More Orchids," with Carole Lombard in the leading role, and as an added attraction "The Last Man," with Charles Bickford and Constance Cummings in the leading roles.

Taken from Grace Perkins' popular magazine story of the same title "No More Orchids," follows the spontaneous and dazzling course of a wealthy society debutante who is almost forced into an undesirable marriage to a title of royalty by a stern and proud grandfather.

"The Last Man," which will be shown as the added attraction, should easily prove one of the most novel screen offerings of the year. The picture is a sea adventure story, with Charles Bickford and Constance Cummings playing the leading roles.

Loew's Theatre

THE feature screen presentation at Loew's Theatre commencing tomorrow is "Fast Life" with William Haines and Madge Evans in the leading roles. The vaudeville bill is headed by Roscoe "Fatty" Arbuckle, the famous film comedian assisted by Eddie McPhail and Jack Shuttla.

"Fast Life" is based on E. J. Rath's novel "Le's Go," in which a young motorboat mechanic and his assistant are determined to get backing for their new type of engine. When they finally do get a wealthy boat builder to construct a craft using their plans, they have a serious accident and are forced to resort to piracy among the millionaires' yachts in the harbor, giving I.O.U.'s for the money they take.

Cinéma Imperial

"MATER DOLOROSA" a drama of force and power without precedent upon the silver screen, is the feature picture at the Imperial for the week beginning tomorrow. It is a story wrought with moving realism, having at its centre a pathetic and beautiful figure, who gives her name to the piece.

Mlle. Line Noro, Jean Galland, Samson Fain-silver and the petite Gaby Triquet do justice to their considerable talent in this emotional and life-like drama. The pathos of the story is chiefly derived from its treatment of the maternal love theme.

The usual short subjects complete the week's program.

Cinéma de Paris

A DOUBLE BILL forms the program at the Cinéma de Paris next week. Le "Rol des Palaces" with Jules Berry and Betty Stockfield is a story revolving around the adventures of the porter of a large hotel and his commercial and emotional relations with the clientele.

The picture is enhanced by songs and a bevy of beautiful women. One of the most diverting fantasies to be shown in local picture houses this season.

The second picture is "Le Fils de L'Autre" a drama of modern London. This achievement brings with it a colorful "mise-en-scene" and is performed with "eclat" that has with it a definite "je ne sais quoi." News-reels, cartoons, comedies and other short subjects complete the program.

Correspondence

The Editor,
The McGill Daily,
Dear Sir,

In view of the fact that through illness I was not cognizant of the contents of the current issue of the Black Sheep and consequently unable to exercise my prerogative as a member of the Editorial Board concerning matter published therein with

which I am out of sympathy, I hereby announce my resignation from the Board.

Yours truly,
Jessie McLeod.

February 2, 1933.

The Editor,
McGill Daily,
Dear Sir:

We owe an apology to Miss Jessie McLeod for having used her name on our mast-head under somewhat irregular circumstances. Miss McLeod associated herself with the Black Sheep at the beginning of its career and accepted an editorial position, but fell ill before the date of publication and was not cognizant of the full schedule of contents.

Feeling that she cannot endorse some of the items which have appeared, she wishes us to make it very clear that she was not actively engaged in putting out the first issue.

Yours truly, W. A. Barclay,
Rachmiel Levine,
E. Carter,
Editors Black Sheep.

Parliament Defeats

Tax On Bachelors
(Continued From Page 1)
The motion, Sufferin, self-styled leader of the Independent Labour party, interposed at this moment with an amendment to the motion that a bonus be given to all bachelors and that birth control information be disseminated. Leo Kunellus favoured the amendment and objected to the original motion on the grounds that it interfered with personal liberty. The population would increase too rapidly and the bill would create unrest. E. H. Cohen and M. W. Bloomfield also spoke.

Visiting Co-eds To

Oppose Home Team
(Continued From Page 1)
Western Ontario. A return visit will be paid to the representatives from the Maritimes by a team consisting of Marjorie Bean of Western University, and Isobel Jordan of Toronto, who will travel east to meet representatives from Dalhousie, Acadia, Mount Allison, and the University of New Brunswick.

Mid-Winter Revue

The Mid-Winter Revue, a benefit presentation in aid of unemployed, will be held at Victoria Hall, Westmount, this Monday, at 8:30 p.m. Many radio stars and professional artists will appear on the program, and Herb Morrissey and his seven piece orchestra will be in attendance.

Cagers Engage Queen's — Puckmen Meet Columbus

Senior Basketeers Play Tricolor Tomorrow Night

Win For McGill Will Virtually Cinch Title — Both Squads Have Defeated Varsity Once This Season — Tricolor Prepare Strong Offensive For Red Visit — McGill Team Intact With Exception of Calhoun — Latter Will Make Trip But May Not Play — McGill Seconds To Meet Y.M.H.A. in Exhibition Tomorrow Night.

TOMORROW night McGill's collegiate basketeers will tackle the powerful Tricolor quintette at the Queen's gym in an attempt to take sole possession of the circuit lead which they now share with Queen's by virtue of the victory each team holds over Warren Stevens' men. The Tricolor showed good form to defeat Varsity by 21-18, and will take a good deal of stopping by the Redmen. However, McGill is expected to extend its string of victories to 14 straight, and they intend to win handily.

Beat Varsity 21-18

Last year in the Queen's gym, Coach Van Wagner's men eked out a very narrow victory over the Tricolor by a one-point margin—and that only after three overtime sessions. On that occasion the Redmen were slow to start, and barely managed to pull the game out of the fire only in the last few moments of play.

Last Saturday's victory over the Blue gave the Tricolor added confidence. Though the game was a close one, as the score indicates, Queen's deserved to win over the fast Varsity team, due to their effective defence and good shooting. On the other hand, Varsity's poor efforts in getting baskets aided materially in their downfall for, according to reports of the game, the Blueboys are said to have had more than their share of the play.

Tricolor Balanced Team

With the exception of Bob Calhoun, who has been laid up with a cold, the whole squad is fit and ready to go. Lee will accompany the team as auxiliary guard, and Hammond will see action alongside Lewin, Faulkner and Small. Young will, of course, be at centre and will take a lot of stopping the way he is going right now. The regular rear-guard of Calhoun and Rice should function as of yore, Coach Van Wagner stating yesterday that Calhoun will make the trip and will play, if able to do so.

Queen's will present a team of veterans, bolstered by a fair sprinkling of newcomers, who have all had, however, a goodly experience in senior basketball. At centre will be Newman, who was a member of Varsity's last championship team, and is now playing his first year on a Queen's lineup. Ted Hallett will be seen at left forward and will take a good deal of stopping, as he is not lacking in experience. The only new members of the squad are McMahon, Brown and Rooke. McMahon has proved his worth and gained a forward berth on the squad, while Rooke and Brown will be used as spares. Carter, Bews and McLaughlin are all old-timers who can be relied upon to extend McGill to the fullest.

McGill's second team are booked for an exhibition game at the Y.M.H.A. floor tomorrow night, at 9:00 p.m. They will meet the "Y" Intermediate City League entry in a match which should prove highly interesting as well as being a good practice for the collegians. The last match between these two teams resulted in a close win for the Mount Royal lads. This, however, was a pre-season tilt, and the Redmen are looking for revenge.

INTERCLASS & INTERFACULTY HOCKEY SCHEDULE		
TODAY'S GAMES		
Fri. 3rd	4-5 Arts 4 — Arts 3.	
	5-6 Arts 1A — Eng. 3.	
Mon. 6th	3-4 Com. 1 — Com. 4.	
	4-5 Arts 1 — Med. 1.	
	5-6 Arts — Eng. (Interfac.).	
Tues. 7th	6-7 Arts 2 — Archit.	
	7-8 Med. 1 — Com. 2.	
	5-6 Arts — Med. (Interfac.).	
Wed. 8th	7-8 Theology — Com. 1A	
	3-4 Med. 3 — Com. 4.	
	4-5 Med. 1 — Com. 3.	
	5-6 MacDonald — Theology (Interfac.).	
Thurs. 9th	6-7 Law — Eng. 4.	
	6-7 Eng. 2 — Arts 2.	
	5-6 Com. — Theology (Interfac.).	
Fri. 10th	5-6 Law — Com. 1A.	
	6-7 Com. 1 — Med. 3.	
NOTE: It is essential that all these games be played, for it is impossible to postpone any more games. The remainder of the Interfacult League has yet to be played and this will take up all the remaining hours.		

R.V.C. BASKETBALL
There will be a practice held at 12:00 in the M.H.S. Girls' Gym. All members of both Senior and Junior teams are asked to turn out.

CITY LEAGUE BASKETBALL
The following men are asked to report at Y.M.H.A. tomorrow night, at 9:00 p.m.: Shandro, Wilson, Finkelstein, Condit, Monahan, Sellar, Ross, Aspler, Dixon, and Halpenny. If any of these men are unable to report, please telephone Ned Potts, LA. 1481, today.

Seven Titles Contested By Red Boxers

George Maughan Receives Trophy For Participation In Olympic Games

WATERFIELD LONE VISITING FIGHTER

WITH the boxers narrowed down to two finalists in each class as a result of the eliminations held recently in the Union, the Interfacult B.W. and F. Assault tomorrow night will see seven college titles placed on the auction block. The meet, which is to be held in the Union Ballroom, gets underway at 8 o'clock and students will be admitted on presentation of the student coupon.

Several beautiful trophies have been put up for competition and will be presented to the respective winners after hostilities have ceased. Hugh MacGregor is leading in the race for Bert Light's cup for the most consistent showing during the year and providing he wins his bout tomorrow night will receive the trophy. George Maughan is to be presented with a cup by the members of the Boxing Club for his brilliant work in winning the Dominion heavyweight championship and representing Canada at the Olympics. In addition, the winner and the loser of the best bout for the evening, among the freshmen, will each receive an award.

Berkowitz Meets Southwood
Berkowitz and Southwood, two smart bantamweights, will open the card in what should prove to be an interesting and well-matched fight. Southwood has done little boxing this year due to the pressure of studies, whereas Berkowitz has had several fights in the past few weeks. Bill Moran, last year's champion in this weight, has been forced to relinquish his title as his nose, twice broken, cannot stand the strain of competition. However, he is still taking an active interest in the club and is the manager at present.

Black and Wolfrey meet in the finals of the featherweight division and Black should take the decision because of his greater ring experience. Wolfrey has only had two fights this year but proved against Smith last Wednesday that he carries a terrific punch for his weight. The winner of this bout will not definitely represent McGill at the intercollegiate meet but will most likely have to tangle with Tam Fyfe at a date to be decided on. As this is a new class, being just created this year, there is at present no titleholder and the winner will be the first champion.

MacGregor Defends Title
MacGregor is defending his lightweight crown against Lionel Swift and should repeat this year without much trouble. Swift has been showing improved form with each appearance and made a favourable impression against Gildea in his last fight. But as this is his first year in the ring, he is not expected to extend Hugh unduly.

MacDonald College is represented in the person of Waterfield, who encounters Gildea for the welterweight title. A new champion will also be crowned in this class as Jack Ewen, the present incumbent, is no longer attending McGill. Waterfield will be remembered to local fight fans for his great showing last year against the powerful-punching Ewan.

Middleweights Clash
Two hard-hitting middleweights, Corbett, of Law, and John Black of Medicine, are each taking their first crack at the title. This is also a new class created by the governing intercollegiate body this year and it should be interesting to see which boxer will be the first to have his name inscribed as champion.

Les MacGregor, Red representative last year in the 175-lb. division, tangles with Red McLennan, who has been enjoying much success in recent fights. MacGregor is much the harder hitter but it is a question whether his hitting prowess can overcome Red's admittedly superior ring craft. "Slip" Gilbert meets "Bad Boy" Brenhouse in the final match on the card. There have been dark rumours as to the validity

Intermediate Hockey Squad Plays Against Caughnawaga Team

Griffiths Back on Line-Up After Two Game Absence

MOORE PLAYS NETS

McGILL'S Intermediate puck squad is hot on the trail of the league-leading Trenholme Park sextette of the West-End loop and hopes to come within two points of them in their game tonight against the heavy and rugged playing hockeyists from Caughnawaga. The Redmen, who now hold second place, have suffered only one defeat in this season's play, both in the West-End and Intercollegiate leagues, their only setback being at the hands of the strong Trenholme Park aggregation, when last year's champions sent them down to defeat by the close score of 3-1, in one of the best games of the loop so far.

After the Bellmen's win over the fast U. of M. team things look particularly bright for an Intermediate Intercollegiate championship. The important contest of this league for the McGill lads is the game at Bishops on Saturday, February 18. If the Red Raiders manage to take this game they will only have Loyola to beat for the championship. In the last and only meeting of these two teams, the Loyola sextette held the Redmen to a 1-1 draw, and the McGill bunch are favoured to take the return match.

McLernon May Play

In the contest tonight the Red Clan may have the services of McLernon one of the Juniors' principal scoring threats, whose back-checking and hard shooting will be a decided worry to the Indians. Ross Wilson and Charlie Letourneau will compose the regular McGill rear-guard and the Braves will find it hard to get their shots away on the Red nets, which will be guarded by Stan Moore, who is playing his first game for the Bellmen and is one of McGill's promising goaling threats.

Harry Griffiths who has not seen service in the last two games will be back in uniform tonight and is expected to turn in his usual good game. Tommy Calder and Carle, fast skaters McGill forwards, are also looked upon to provide trouble for the Indians along with Bill Tait and Broome who was outstanding for the Wilson sextette in their game against the French students at the Mount Royal Arena last Saturday night.

Staff Vacancies

There exists at the present time several vacancies in the reportorial staff of the Sports Department. Any students interested, whether male or female, are asked to see the Sports Editor in the Daily Office between one and two today.

of Brenhouse's nickname as so far he has shown a strong disinclination to hit his opponent in the ring. On the other hand, Gilbert, while showing wonderful defensive form, has not as yet opened up and the fight may result in both boys hugging each other for the nine minutes.

Surprise Result

At last night's exhibition fights at the Graduates' Smoker, Berkowitz pulled off a surprise when he downed Harvie Black at catchweights, the winner scaling 117, while Black was eight pounds heavier. Berkowitz pressed the fighting at the start and landed several hard blows but his eagerness caused him to leave several openings on which Black capitalized by crashing his fist against his opponent's nose and giving it a decidedly claret hue. Berkowitz played more attention to his defence in the final two rounds, at the same time not letting up in his demoralizing offensive and won a popular victory.

Hugh MacGregor conceded Corbett about twenty pounds in the other bout but more than held his own and, in fact, won the decision. This fight was exceedingly close, MacGregor catching the judges' eye because of his better ring generalship. He ducked and weaved repeatedly under Corbett's blows and although he was staggered several times by Corbett's left, he emerged fully intact at the end.

Cosmic Rays Show Expansion Of Space Conception Correct

Continued from Page One

old conception of a primeval nebula. The older theory states that in the evolution of the universe there was a process of slow condensation of the nebulae. But the age of the universe is only a few times that of the earth, therefore it requires an evolution which works rapidly at first and then slows up. The evolution of the universe in a short space of time is based on a system of radioactive disintegration.

According to the new theory there are two types of atoms. One is the lead type, the residue of a series of super radioactive disintegrations. The

Irishmen Oppose McGill Tonight In Home Game

Last Scheduled Game For Which Coupons Are Good — Double-Header Moved Back From Feb. 22 — Canadiens Play Vics in Second Match — Win Will Safeguard Lead Threatened by Frenchmen — McHugh Expected to Guard Cage — Farmer Not Likely to Don Uniform — Erratic Irishmen Will Offer Stiff Competition.

PLAYING their third game of the week the Redmen line up tonight against Columbus in the first game of the double-header which brings together Canadiens and Victorias in the second match. Tonight's game is a home game for McGill and coupons will be valid. This is the first opportunity that McGill supporters have had to witness Columbus by means of coupons and they are expected to take advantage of the chance to see the battling Irishmen.

Matmen Will Compete In Eliminations

Pistreich And Redewill To Grapple Tomorrow — Winner Meets Patton

BELLI ANNEXES 118-LB. CLASS UNCONTESTED

THE Wrestling Club, after suffering from a lack of material all year, now finds itself swamped by candidates, and as a result, the eliminations will not be completed until tomorrow afternoon when Pistreich grapples with Redewill in the semi-finals of the 165-lb. division. The winner will then encounter Patton in the finals tomorrow night, in one of the six wrestling titles to be decided. Belli, a freshman, takes the 118-lb. title without opposition as he is the only candidate for the position.

Lapin, two-time college champion and present intercollegiate champion, is prepared to bring to nought the challenge of Don Black for his 125-lb. title. That Black is a worthy challenger is proved by his smart showing at the M.A.A.A. exhibitions last week when he scored an early fall against Belli and only conceded a return fall a few moments before the end of the bout.

Experienced Fighters

Two experienced men take to the mat after the opening bout when Meagher and Olesker contest the finals of the lightweight class. Both these men have been knocking at the championship door for some time. Meagher lost out in the finals to Gibb last year, while Olesker passed out at the hands of Fulcher. Meagher won his way to the finals yesterday when his opponent, McLeann, suffered an injured shoulder and had to withdraw. Olesker showed the results of his steady turn-out to practices when he took two straight falls from Salter in the semi-final round.

Myer Golfman, the hard-luck wrestler of the squad, will attempt to regain his former laurels when he meets a little-known performer, Jankov. After gaining the intercollegiate crown for two years in succession, Myer hit on a lean period and for the past two years has been kept out of competition by injuries suffered when he was at the top of his form. Both wrestlers will weigh in at 145 pounds.

Dainow Favoured

In the 155-lb. division, Dainow, a consistent performer throughout the entire season, will follow up his strong bid of last year for the crown, when he just lost out to Paynter in an overtime bout, by attempting to throw Hall for a fall. Dainow won his elimination bout yesterday against Smith in short order. He took the first fall in three minutes and fifteen seconds of the opening round, while he needed just forty-five seconds of the final round to pin Smith's shoulders to the mat.

The Patton vs. winner of the Pistreich-Redewill match will then follow and the final title to be contested will lie in the heavyweight division. Abramson and Porteous have thus far signified their intention of challenging for the championship and will try to reach a decision as to whom the crown best fits. However, it is expected that Cooper will also file a claim and if so, Cooper and Porteous will engage in an elimination fight tomorrow afternoon at the Field House.

other is of the helium type, the product of successive steps in the process. It is a fact that atoms exist in different quantities, and the common ones are probably of the helium type, and ejected as rays in the disintegration.

If the cosmic rays are only super radioactive rays then they would logically contain electrical particles. The observations now being carried out on these rays show that they are effected by the earth's magnetic field. This conclusively places them as the result of super radioactive disintegration which occurred before the formation of the earth.

Medicine 1 Droops To Arts Seniors In Close Hoop Struggle

Final Score Stands At 22-21 — Dispute Over Last Basket

OVERTIME NEEDED

ARTS 4 skinned their way through a thrilling overtime period yesterday afternoon over the snappy basketball representatives of Medicine 1. The score, 22-21, shows just how close a contest it was. The teams were very evenly matched, and it took every effort of Ross Wilson and his men to defeat the fighting medicine.

The game was a close-checking, heady exhibition, with both squads striving for the lead every minute of play. The first period commenced with Arts carrying the play to their opponents. Neither team, however, could gain any definite advantage over the other, and half time found the Classicists enjoying a one-point lead, the count being 7-6. Penalties: Arts 2, Med. 1.

The second session was a replica of the first, as far as tight, brilliant basketball goes. The sawbones took an early lead, which, however, was short-lived. Arts then drew away to a 16-10 advantage. Med. again closed up the score, but the Artists retaliated with a four-point spurt, making it 19-15. With two minutes to play, Banning, sensational Medical forward, tied up the game at 19-19, ending the full time play. The penalties were: Arts 4, Med. 8.

During the overtime, both teams played cautiously, waiting for the all-important break. Arts were the first to score, Sam Brenhouse dropping the sphere for two points. Banning tied it up again, making it 21-21. Arts scored the winning point on a free shot, but not before Miller, of the medicine men, threw a scare in

CANADIAN OFFICERS TRAINING CORPS.

Contingent Orders, Part 1. No. 92-94

By Lieut-Colonel E. B. Q. Buchanan

Officer Commanding

Montreal, Tuesday, 31st January, 1933

32. Duties

Orderly Officer for the week commencing 5th February, 1933 — 2nd Lieut. T. H. Carlisle.

Next for duty — 2nd Lieut. F. W. Wiggins.

Orderly Sergeant for the week commencing 5th February, 1933 — Cpl. J. N. Loucks.

Next for duty — 1. Cpl. L. Beauchene.

33. Parades

The Contingent will parade at the Armoury of the Canadian Grenadier Guards on Tuesday, 7th February, 1933, at 8.05 p.m. for training.

DRESS: Drill Order.

34. Certificate Class

(a) The Sixth Lecture for Candidates for Certificates will be given at

the Orderly Room on Monday, 6th February, at 8 p.m.

(b) Syndicate Leaders will report to Major Pennell in the Officers and Cadets Mess on Monday, 6th February, 1933, at 8 p.m.

(c) All candidates and Syndicate Leaders are again reminded that the practical examination will be held on Tuesday, 14th February. Further particulars regarding the examinations will be announced on the parade on Tuesday, 7th February.

J. S. BRISBANE,
Major and Adjutant.

Special Notice: An informal Dance will be held in the Officers and Cadets Mess on Friday evening, 10th February; a charge of \$2.00 per couple will be made in order to defray expenses.

NOTICES

1851 SCHOLARSHIPS

Three scholarships will be awarded to Canadian Students in 1933.

These scholarships of the annual value of £250, and normally tenable for two years are awarded to graduate students in scientific subjects who have already done successful research work. They must be held outside Canada.

Applications must be made through the Chairman of the students' department, and before the end of February, and after consulting the professor with whom they are working.

Further details may be secured from the Registrar's office.

SPANISH CLUB

The Spanish Club debate will take place on Monday, February 6th

Hand Tailored Where
Hand Tailoring Counts

When the woollens were first shown in the clothing department every salesman crowded round with enthusiasm. These fabrics are going to be sold for 16.50! Every suit with hand-tailoring at this price! Over 150 different patterns! When clothing men who see good suits and great values every day in the week get as enthusiastic as they did about this sale — then it means something unusual!

Every suit will be tailored to measure. We don't care how hard you are to fit — we GUARANTEE a suit to fit you. Choose from over 150 different patterns.

We've made special arrangements to give quick service. Several times the usual number of fitters. Extra salesmen, extra space. The stage is set. Friday brings another smashing EATON Suit Sale! Don't miss it.

2 or more of these suits may be purchased on the Deferred Payment Plan!
